

Project Management on Demand™ – the Missing Link

When projects break down, the fallout can be devastating. Organizations find that they have wasted valuable time, money, and effort on undelivered benefits. Furthermore, additional resources may be required to attempt to recover struggling projects, increasing budgets and extending timelines. Team members and stakeholders often become frustrated and disengaged. With so much riding on project success, it is shocking that more than half of all projects become challenged – or end in failure¹.

Tramore Group has observed that even organizations with an established Project Management Office (PMO), Project Portfolio Management (PPM) software, a collaboration environment, and standard practitioner tools frequently still struggle to optimize project delivery effectiveness. Something is missing.

To further complicate matters, the pace of change is accelerating, and the demand for Project Managers is increasing along with it, creating new challenges for organizations. They need to onboard Project Managers who can hit the ground running, and can successfully deliver the change more effectively and efficiently than before. PMOs and Project Managers need the tools, processes, and skillsets to deliver projects on time, within budget, and with the expected business benefits – every time.

Standardize, Centralize & Educate – Keys to Success

Standardization is crucial – organizations need all their project teams on the same page using the most current approved project management processes and templates. Since Project Managers have different levels of knowledge and experience, they need a single reliable source of information and education to fill in the gaps. In the end, project teams need one central destination point where they can access everything they need to be successful.

Building a PMO central repository and standardizing everything – from project management processes and document templates, to training and education activities – is a massive undertaking. It can also be costly and take years to complete. Tramore Group has observed the frustration many organizations experience as they try to do this themselves. We found a better way.

Project Management on Demand™

Introducing **Project Management on Demand™** (PMoD), a better way to achieve project delivery effectiveness and improved project outcomes – a proven, out-of-the-box solution with more than 1,100 customers worldwide². PMoD is a centralized PMO repository that can be installed quickly and easily customizable – every screen and template imitate the organization's brand standards.

Project teams gain immediate access to a full suite of easy-to-use project management tools, techniques, templates, and education. PMoD delivers in days what many organizations spend years trying to achieve – often with limited success – and it does so at a fraction of the cost.

“Organizations that invest in proven project management practices waste 28 times less money because more of their strategic initiatives are completed successfully.”³

How PMoD Works

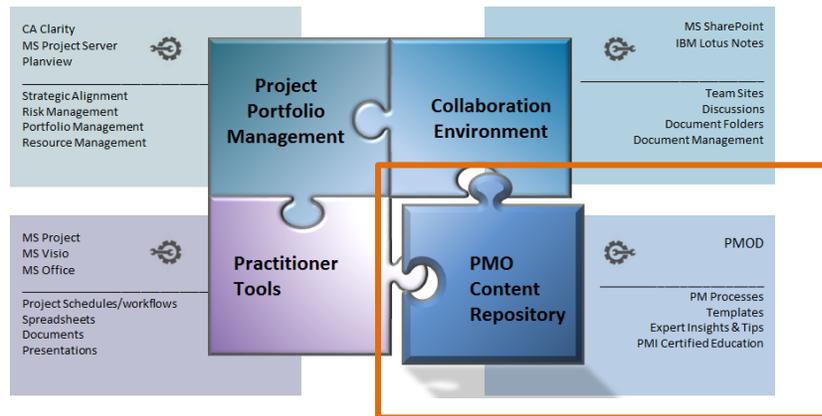

PMoD is accessible on a desktop, laptop, tablet or smartphone. Project Managers gain access to the three most common industry project methods, an extensive library of standardized templates, online learning modules, and insights from experienced project management experts. As a comprehensive knowledge centre that can be customized and built upon, PMoD can help propel organizations toward more consistent project success and improved competitiveness. PMoD is the missing link to project success!

PMoD Complements other Software & Tools to Complete the PMO Solution Suite

The PMoD Value Proposition

Project Management on Demand™ provides a unique, top-of-the-line PMO repository with a full suite of easy-to-use project management processes, tools, and techniques that are customizable to your organization's needs.

Enhance the quality, consistency, and integrity of your PMO – quickly, efficiently and seamlessly with a cost-effective browser-based solution that is accessible on multiple platforms.

PMoD is Comprehensive and Customizable

- An out-of-the-box solution with processes and templates that can be customized to align with your organization's brand standards and policies

PMoD has Rich Content

Project Management Life Cycles

- Supports Standard, Complex and Agile (Scrum) project types
- Processes can be customized to align with your enterprise methodologies

Templates

- Includes 115+ version-controlled templates
- Add, replace or modify templates to align with your corporate standards

On-line Learning Videos

- Includes 275+ multimedia education-on-demand modules in project management essentials that can lead to industry certification (PMI)

Tips & Insights

- Includes 125+ useful project management insights from industry experts

PMoD Target Audience

- Private sector or public sector organizations with a current or emerging PMO

PMoD Benefits

- Standardized project management by providing the most current approved processes, templates, education, and insights in a central PMO repository
- Accelerated PMO start-up
- Reduced time to on-board new PMs
- Easier to move resources between projects when all PMs are using common processes and version-controlled templates
- PMPs can earn PDUs by completing PMI-certified training modules
- Can be customized and implemented in days
- Fraction of the cost of building a similar capability in-house

PMoD System Specifications

Industry standard generic LAMP software:

- Operating system: Linux or Microsoft
- Web server: Apache
- Database: MySQL
- Dynamic scripting language: PHP
- Disk space: 30 GB

Experience PMoD Today

To see how PMoD can improve your ability to deliver projects successfully, **please call or e-mail Tramore Group** today to arrange a demonstration.

Tramore Group is a leading professional services firm specializing in program and project management.
